AHSANULLAH UNIVERSITY OF SCIENCE AND TECHNOLOGY

Department of Computer Science and Engineering

Course Title: Algorithms Lab Course Code: CSE 2208 Marks: 6

1. You are given a **sorted array** of size $\mathbf{10^5}$.(Please refer to the attached file : *sorted_random.txt*).Compare the performance of three sorting algorithms -
   i) Insertion Sort ii) Merge Sort iii) Quick Sort and report the results found from your analysis.

   ***** You should - *****

   i) Read input from the attached file : **sorted_random.txt**

   ii) Consider the **first element** as the **pivot** in case of **Quick Sort**
